

About Lumos Data Centers

Lumos Data Centers (LDC) offers high availability services out of three enterprise class data centers in Charlotte, NC, and 11 facilities across VA, WV, SC, NC and GA. The enterprise class data center facilities are staffed 24x7x365, SSAE 16 SOC 1 and SOC 2 Type II certified, and PCI DSS and HIPAA compliant. Enterprise services include Colocation, Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS), Storage as a Service, Security as a Service, and Backup and Recovery as a Service. LDC also acts as a carrier hotel, with 12 of the largest carriers in Charlotte having fiber routes and/or Points of Presence (POP) within our facilities, allowing robust options for our clients. With direct connectivity from the Lumos Networks and Spirit Communications expansive fiber footprint, along with ample options for connectivity, LDC is uniquely positioned to offer our clients on-net data center and colocation services.

Disaster Recovery as a Service (DRaaS)

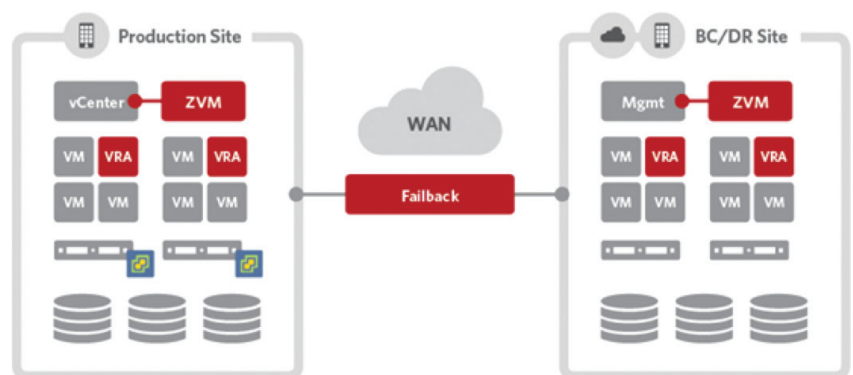

Lumos Data Centers (LDC) Disaster Recovery as a Service offering was developed in collaboration with our partners, leveraging industry best of class hardware and software solutions. The infrastructure is housed in one of our highly available enterprise class data centers, and has been built according to industry and manufacturer best practices.

LDC engineers and architects will work with you to design, build, test, and deploy a best practices driven solution allowing failover with the click of a button, while maintaining protection of your production applications.

Here's how:

- All flash storage
- Recovery Point Objectives (RPO) of seconds due to continuous data protection
- Two hour Recovery Time Objective (RTO)
- 99.99% hardware and software availability SLA
- Enterprise class data center support during all failovers and fail-back procedures
- 30 Days Journaling
- Solution is on-net with the Lumos Networks and Spirit Communications expansive fiber network
- Robust reporting offering visibility to protection state and resource consumption
- Best in class partners
- Granular protection and point in time recovery of files, Virtual Machines, and applications
- Simple to use with hypervisor integration enabling protection of only the Virtual Machines you choose to protect
- Compatible with VMware vSphere and Microsoft Hyper-V hypervisors
