

About Lumos Data Centers

Lumos Data Centers (LDC) offers high availability services out of three enterprise class data centers in Charlotte, NC, and 11 facilities across VA, WV, SC, NC and GA. The enterprise class data center facilities are staffed 24x7x365, SSAE 16 SOC 1 and SOC 2 Type II certified, and PCI DSS and HIPAA compliant. Enterprise services include Colocation, Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS), Storage as a Service, Security as a Service, and Backup and Recovery as a Service. LDC also acts as a carrier hotel, with 12 of the largest carriers in Charlotte having fiber routes and/or Points of Presence (POP) within our facilities, allowing robust options for our clients. With direct connectivity from the Lumos Networks and Spirit Communications expansive fiber footprint, along with ample options for connectivity, LDC is uniquely positioned to offer our clients on-net data center and colocation services.

Storage and Backup as a Service

Managed Storage, Backup and Replication Services provides the Client a wide array of data protection and data storage service capabilities including managed backup, SAN storage, and replication services. These services allow our Clients to manage their data in an effective manner to meet their business requirements.

LDC storage solutions include:

- High availability, fault tolerant architecture
- Fully managed, monitored and supported 24x7x365 within LDC data centers
- Optional encryption
- Performance levels to match our Client's application
- Replication options offered between a LDC data center and client data center
- Backup and recovery of client data
- Delivered as a service without the need for capital expenditure
