

We make wireless work.

Wireless Solutions for the Healthcare Industry from Broad Sky Networks.

Healthcare Demands More Mobility Than Ever Before

Aging populations, downward cost burdens, and increased demand for access is driving the economic burdens on the healthcare industry. Now, healthcare providers are no longer charged with simply treating patients in the office, but also need mobile healthcare practitioners to service patients in the field where they live. Couple this with the massive growth in the industry, and providers are scrambling to be more innovative and budget conscience while continuing to provide impeccable patient service.

Connectivity Powers Cloud-Based Apps

While technology offers greater access to patient records and resources through cloud applications, reliable network connectivity is critical to ensure these apps stay up and running when doctors and nurses need them. Broad Sky's 4G/LTE wireless solutions provide the flexible connectivity healthcare professionals need to power the applications they use to effectively treat their patients while being competitive in the market place.

Redundancy Saves Time, Money, and Lives

Healthcare resources have moved to the cloud. Patient databases, appointment schedulers, and prescription information tools improve efficiency for hospitals, clinics, and doctor's offices, but an internet outage can result in limited or no access to critical data. Delayed appointments and missing information costs their patients time and providers money. Our 4G/LTE solution serves as a diverse backup solution, providing instant access in the event of an internet outage and keeping healthcare practitioners and patients connected without missing a beat.

Why Broad Sky?

- ◇ Your single source for cost-effective, timely, reliable wireless connectivity solutions.
- ◇ Broad Sky engineers solutions for success using the latest hardware, multiple providers, and white-glove technical support.
- ◇ NO CAPEX options with bundled pricing.
- ◇ 14+ years in the wireless industry offering technology-specific expertise.
- ◇ 4G LTE, LTEA and VSAT solutions from any wireless provider in North America.
- ◇ Pooled pricing plans across all carriers.
- ◇ Professional installation services anywhere in North America.

Wireless Solutions for Healthcare

Internet of Things Connects Devices to Doctors

With the rapid growth in the Healthcare industry, the needs have expanded with the services the Healthcare Professionals provide. Internet of Things (IoT) applications are transforming the ways that healthcare organizations are conducting business, caring for patients, and monitoring life-saving assets.

- ◇ **Challenge** - Treating patients that can't be treated in the office due to patient mobility issues, inclement weather, or risk of infection.
 - ◇ **Solution** - Always-on connectivity provides the latest in 4G/LTE connectivity, WiFi, GPS, and cloud management to bring healthcare to patients when it's needed most.
- ◇ **Challenge** - Lack of communications and patient information for mobile healthcare providers.
 - ◇ **Solution** - Mobile internet connections bring mobile clinics, blood drives, and life-saving information to patients when they need it, where they need it.
- ◇ **Challenge** - Inability to treat patients in the event of a network outage.
 - ◇ **Solution** - Network failover is critical to avoiding downtime and providing efficiency in patient diagnosis and care. 4G/LTE speeds and wireless networking give IT departments the failover and redundancy they need for a unified failover solution.

The New Healthcare Professionals

Mobile Care Givers | Mobile Doctors | Remote Healthcare

Emergency Responders | Mobile Clinics
