

Company Profile

Industry: Chemical Manufacturing

Company Size: 8,500 employees

Headquarters: West Palm Beach, FL

“With Aryaka, we’ve measured the impact in terms of costs savings. We’ve saved approximately 2-3 million dollars over a traditional MPLS solution... We’ve also seen a significant increase in file transfers. Anywhere up to 20x increase in speed.”

**Dustin Collins,
Vice President
Global Infrastructure Services
Platform Specialty Products**

Platform Specialty Products Scales 78% Faster with Aryaka SmartCONNECT

Specialty chemical company deploys 190+ sites in four months and saves \$2-3 million over MPLS

The Problem

Platform Specialty Products, a global, diversified producer of high technology specialty chemical products and provider of technical services, is in the business of blending raw materials through multi-step technological processes and formulating active ingredients into final products. But to the build the business, they also had to blend multiple chemical companies into one organization through mergers and acquisitions.

The nature of the business is such that Platform Specialty Products must be cloud-ready, able to scale, and functional in multiple remote geographies; network connectivity is fundamental to the process of integrating acquired companies, and connecting IT users in emerging markets was fundamental to the success of their sales teams. On their former network, Platform Specialty Products felt that connecting users to applications was a nightmare: Site-to-site VPNs required multiple days to connect, and without a fully routable global network, they had isolated client VPN solutions that cost the company hundreds of thousands of dollars globally.

Though they knew that securely connecting anyone, anywhere to their company-authorized resources were table stakes, MPLS, even with WAN optimization, did not allow them the flexibility, security, speed, or scalability they needed to quickly integrate their merged businesses.

Aryaka's SmartCONNECT:
A cloud first approach providing flexibility, security, speed, and scalability to quickly integrate merged businesses and emerging markets.

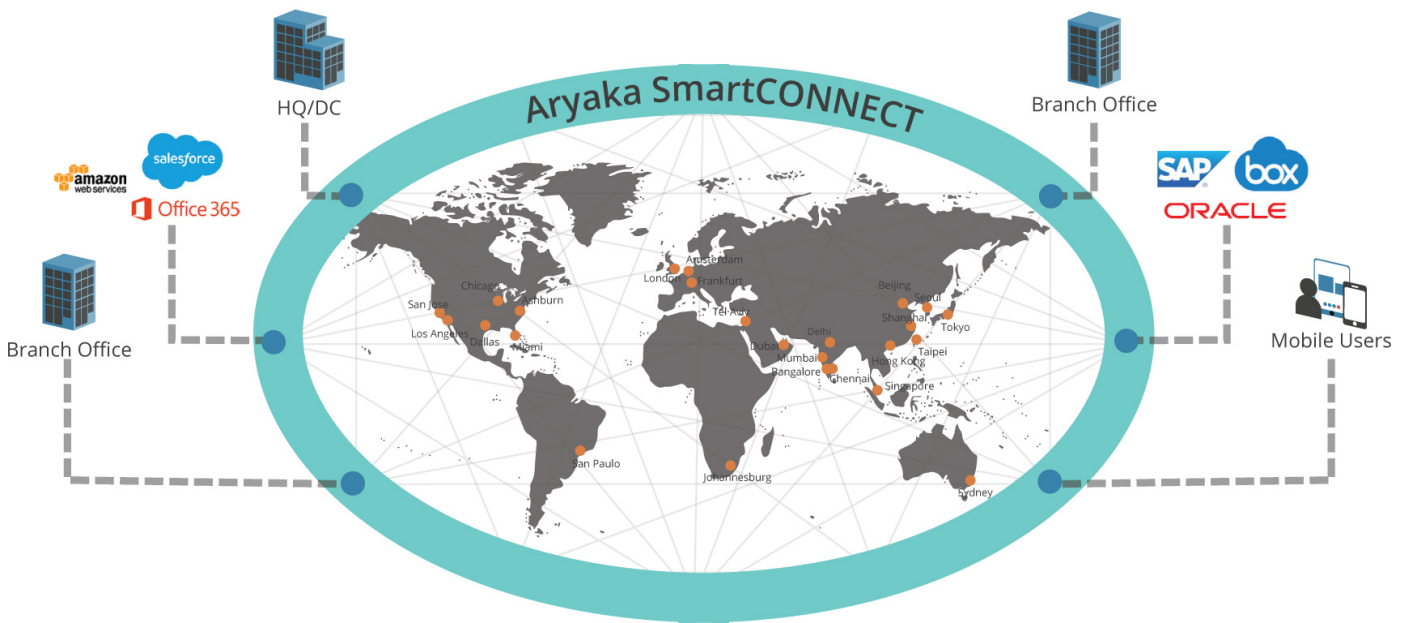

Platform Specialty Products Scales 78% Faster with Aryaka than MPLS

The Solution

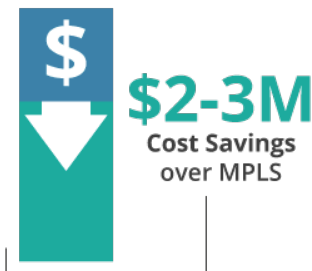

Platform Specialty Products looked to Aryaka, because, for their industry, MPLS is a dying technology and the Internet alone was not optimized or secure enough for the performance they expected. With business being conducted in the cloud, they needed a “one-stop shop” that deployed quickly and covered the middle-mile.

Platform Specialty Products choose Aryaka’s SmartCONNECT technology as the solution for building a secure network with a cloud-first systems approach and reaching the “unreachable” at the cost that they needed to deliver the network in some of their emerging markets.

Aryaka provided a full mesh 190 site network with wan optimization and provided DNS redirects for a centralized client VPN.
