A flexible cloud phone solution for remote teams

Simple setup

No hardware. No headaches. Create numbers in 100+ countries and begin onboarding teammates from multiple departments by the end of the day. Keep your remote teams connected and integrate all your tools in just a few clicks.

Accelerate team productivity

Use Aircall's collaborative features to seamlessly transfer or assign calls to remote teammates and reach resolutions faster. Aircall automatically syncs call activities to your CRM or Helpdesk — keeping that information accessible to the whole team.

Individual flexibility, shared success

Automatically align your calls and your calendars by allowing each of your teammates to define when they're available to take calls, or manually toggle their presence on/off. Customize your settings so that everyone on your remote team is accountable, aligned, and positioned for success.

Gain real-time perspective

Aircall's analytics and dashboards make it easy for you to keep an eye on metrics and the performance of your agents whether they work from home or not. Managers can gain visibility into team activity with the Live Feed and even hop on calls secretly to help steer agents into the right direction.

TRUSTED BY THOUSANDS OF DIVERSE COMPANIES

Aircall has dozens of pre-built integrations to the top cloud platforms businesses and organizations are using today, including:

Hubspot
CRM

The HubSpot phone integration with Aircall allows you to connect all your call information into HubSpot. Surface all caller data during a call and save it into your client records instantly.

Salesforce
CRM

Connect Aircall to Salesforce in one click. Make and receive phone calls directly from your Aircall app within Salesforce.

Zendesk
HELP DESK

Start making and receiving your calls directly from Zendesk. Automatically create tickets and match your incoming calls to your existing customer records.

Microsoft Dynamics
CRM

The Microsoft Dynamics Aircall integration empowers your sales and customer support representatives to add data and context to their phone conversations.

Microsoft Teams
PRODUCTIVITY

Choose the Aircall events to get notifications about directly in the platform your team uses to collaborate and stay connected.

Nicereply
SURVEYS

Integrate Aircall with Nicereply to send CSAT, CES or NPS surveys automatically after a call.
